

Introduce yourself and tell us why you chose this course.

My name is Aditya Kumar from Sitamarhi, Bihar . I will be completing my Bachelor's Degree in Computer Science and Engineering from Bengal College of Engineering. I have done a internship at Techmihirnaik as a Programmer as well as Team Leader, where I led a project food delivery website where my primary focus is on Creating, and Debugging all the codes. I have also worked on variety of projects on Python and Data Science. My strengths are self motivated, focused and quick learner. I always move forward with positive attitude. My weakness are I am always trying to do work perfectly which takes a little bit more time but it gives me more satisfaction after completion. My goal is to become a Data Engineer. My hobby is reading books, quora and watching YouTube videos.

I choose Data Science course for a couple of reasons:

- i). I love to play with data.
- ii). It was a subject i did at a level, the only subject i have found to completely and utterly grab my attention and interest me fully.
- iii). Studying it will give me a number of transferable skills. I never thought of employability to be honest, I have never been worried that i would not find a job in the future...maybe a little naive, but I would prefer to do something.
